Dear Prof Zammit, dear Prof Davoli, dear Prof Bolla,

I have sent you a link to work in progress on the questionnaire I plan to address to NANOG, ITNOG and UKNOF (and possibly other operator groups).

I have shared the content to update you on the status of this track in my work.

Responses to the questionnaire should reinforce what I have gleaned from webinars served by LightReading, several of which have analyzed responses to surveys they have circulated (see, for example, [this webinar](#) - registration required).

Warm regards,

Etienne

Will you be publishing this as an anonymous survey Etienne?

The data you request can be viewed as confidential by participants, but you may also need to know the size of the market each respondent addresses, if you are after establishing the global market share of the various services and technologies.

Do you consider this to be an issue?

Saviour

Excellent observation;

I had considered tackling this by asking questions about annual revenue and/or company size.

That seems to be the way in which Informa Tech (Light Reading's brand owner) classifies respondents without seeking identity.

What do you think?

Warm regards,

Etienne

Depends on what you are going to use the information for. Is it to justify the selection of a technology to focus on?

| Is it to justify the selection of a technology to focus on?

Not only; that's only part of the goal.

My motivation is to reaffirm what I have learnt from public data about metro area networking trends up to the mid-term future (ca. 2025).

To fit this in with the proceedings of my thesis,

I refer to the architecture schematics in the architecture shared drive;

the T - V RP segment (part of what we commonly refer to as access) is meaningfully illustrated (albeit incomplete).

What I illustrate on the schematics and what I learn from survey responses should at least be compatible, and ideally cohere throughout all segments.

Warm regards,

Etienne

Can we have a short online chat? I need to understand better what you are aiming to achieve with the survey before I can venture a reliable response. Just trying to help :)

To: Saviour Zammit <saviour.zammit@um.edu.mt>

Yes please :)

My only fixture today so far is between 5 - 6:30pm. Any other time (or date) you're available will suit me.

Cheers,

Etienne

To: Etienne-Victor Depasquale <edepa@ieee.org>

I commented through another thread. I understood that you are going to add to the survey questions. Is that correct?

Saviour

To: Saviour Zammit <saviour.zammit@um.edu.mt>

Yes:

- (a) locations of MEC deployment
- (b) metro-core configurations
- (c) operator's size, revenue and geographic market segment

What do you think?

Cheers,

Etienne

- 1) I have no adverse comments to make re the question classes you mention below.
- 2) I look forward to supporting you by reviewing the whole questionnaire.
- 3) I believe that the framework that you are proposing should encompass all the configurations you shall be proposing, so that you can apply it as an exercise on the most popular configuration.
